Advance patient care and your practice

Instant endometrial imaging guided by direct visualization

Efficient workflow with in-office exams that better prepare for and reduce OR visits

Low-cost investment that is coded and reimbursed as hysteroscopy

endosee® ADVANCE

See now. Know now.™
See and know instantly with Endosee® Advance

Discover all the ways this direct visualization system can elevate your practice²-⁶

**Evaluate**
- Abnormal uterine bleeding (AUB), premenopausal and postmenopausal⁴
- Menstrual disorders: amenorrhea, intermenstrual bleeding, and menorrhagia⁴
- Infertility⁴,⁵
- Recurrent miscarriage²

**Identify**
- Polyps⁴,⁵
- Fibroids⁴,⁵
- Retained products of conception⁴
- Tissue in need of biopsy for histologic evaluation⁴
- Focal lesions missed with endometrial biopsy (EMB) (when EMB is incomplete and not diagnostic)⁴
- Endometrial atrophy⁴

**Perform**
- Transection of intrauterine adhesions and septa⁴
- Directed endometrial biopsies⁵
- Polypectomy (pedunculated, <2 cm)⁵
- Localization and retrieval of IUD⁵
- Presurgical planning for removal of submucosal fibroids and large polyps or uterine septum repair²,⁴
Endosee® Advance allows you to identify focal pathology more precisely than EMB, SIS or TVUS. In one study, endometrial biopsies in women with known carcinoma were shown to be only 83% sensitive in finding the existing pathology.

17% of existing pathology can be missed with EMB. Other studies demonstrate a range of 68% to 84% sensitivity.

Direct visualization is more precise than SIS and TVUS in assessing endometrial pathology.

Intracavitary masses (myomas and polyps) vs. Diseases of the endometrium.

See the difference Endosee Advance can make. The clear color display delivers the most accurate visualization.
Endosee® Advance is designed for convenient use in any exam room, at any time.

Average time of procedure using Endosee Advance:
<3 minutes\textsuperscript{10,11}

Average total time doctors were in the exam room per procedure:
<13 minutes\textsuperscript{11}

Nearly 60% of women who underwent diagnostic office hysteroscopy for AUB were able to avoid the need for intervention in the operative suite\textsuperscript{1,3}

Know with confidence if the OR is needed so you can maximize workflow and office efficiency\textsuperscript{1,3}

In-office exams with Endosee Advance can better prepare for and reduce OR visits\textsuperscript{2,3}

In 99% of initial use cases, Key Opinion Leaders said they were “satisfied” or “very satisfied” with Endosee Advance (68 out of 69 cases)\textsuperscript{12}
Endosee® Advance is a reusable, low-cost advancement that gives you reliable in-office use

Avoiding OR intervention may save approximately $3,500 per patient\(^1,3\)
Estimated calculation of savings in procedure charges of patients undergoing diagnostic office hysteroscopy who did not need to undergo OR hysteroscopy.

### Example of cost breakdown

Coded and reimbursed as hysteroscopy

**CPT codes**

- 58555–Hysteroscopy, diagnostic
- 58558–Hysteroscopy, surgical, with sampling (biopsy) of endometrium and/or polypectomy
- 58562–Hysteroscopy, surgical, with removal of impacted foreign body

Payments for physician services are established by CPT codes according to a fee schedule. Under the Medicare Physician Fee Schedule, CPT codes are assigned Relative Value Units (RVUs), which represent the relative amount of physician work, resources, and expertise needed to provide services to patients. Payments differ depending upon where the service is provided (facility or non-facility) to accommodate the expenses associated with procedural equipment, personnel, and supplies, etc., and may vary by payer and benefit plan.

Helps you and your patients avoid the hassles and worry of delayed diagnosis\(^2,3\)

Endosee Advance helps reduce:

- Extra appointments
- OR costs
- Wait times
- Staffing allocation and training
- Schedule conflicts
- Sterilization costs

Immediate diagnostic information at the time of visit reduces your patients’ worry and stress of waiting\(^9\)
Endosee® Advance

The all-in-one, direct visualization system for diagnostic and therapeutic procedures

Features to help elevate your in-office procedures

- Your exam is guided by clear color visualization
- Reusable display module
- Sterile, single-use cannula designed for ease of insertion
- Channel for fluid infusion
- Reusable working channel instruments
- Still image or video capture of every exam
- See the picture you just took
- Transfer exam data to your computer via USB cable
